

Using Authorization Strings with

Authorization Strings

- This presentation shows how to use Authorization Strings in PaperClipPlus™
- Authorization Strings give the sender precise control over who can get their files.
- PaperClipPlus™ supports fine-grained control based on the recipient's e-mail address.
- The sender can require that the recipient has a verified PaperClipPlus™ account.

Our 'Getting Started' example used 'open' authorization to allow any recipient with the PaperClipPlus file link to view the file.
